

AnySensor: **AnyData,** AnyTime, AnyWhere

Welcome to the future of anything. AnySensor is the IoT data intelligence platform built for precision real-time monitoring.

CORE DEFINITION

What is AnySensor?

- Smart modular IoT solution
- Reliable data acquisition
- Seamless system transmission
- Connected intelligence

AnySensor provides a robust framework for capturing and moving data across complex connected systems with absolute reliability.

Built by Dasstec: **Quality** in Production

We control every step of the process, designing and producing our own hardware to ensure maximum performance and reliability.

100% Dasstec production

In-house electronic boards

Custom 3D printed housings

Total quality control

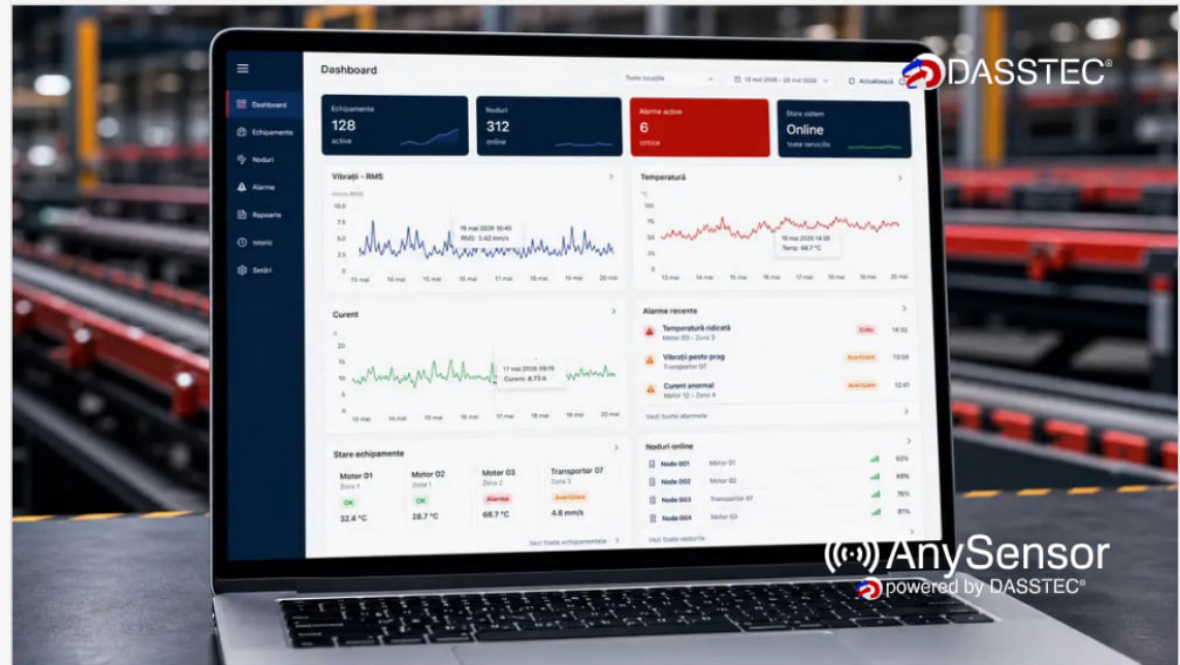

| AnyBI: Connected Intelligence Platform

99.9%

Operational Uptime

Transform raw operational data into actionable intelligence with a unified flow from your entire infrastructure.

- Unified automation flow
- Real-time business insights
- Logistics data integration
- Infrastructure monitoring

Intelligence Efficiency Gain

Automation

NATIVE IN AUTOMATION

Hardware: **AnyBox** & AnySensor

One device can do anything. Our hardware is designed to be modular and easy to integrate for any data type in any industry.

Modular hardware design

Cost-optimized integration

Industry-agnostic utility

Plug and play deployment

Modular 4-Layer **Architecture**

01

Layer 1: Data Acquisition

02

Layer 2: Processing

03

Layer 3: Transmission

04

Layer 4: Intelligence

Our modular architecture allows system integrators and OEMs to deploy tailored telemetry solutions with unprecedented ease.

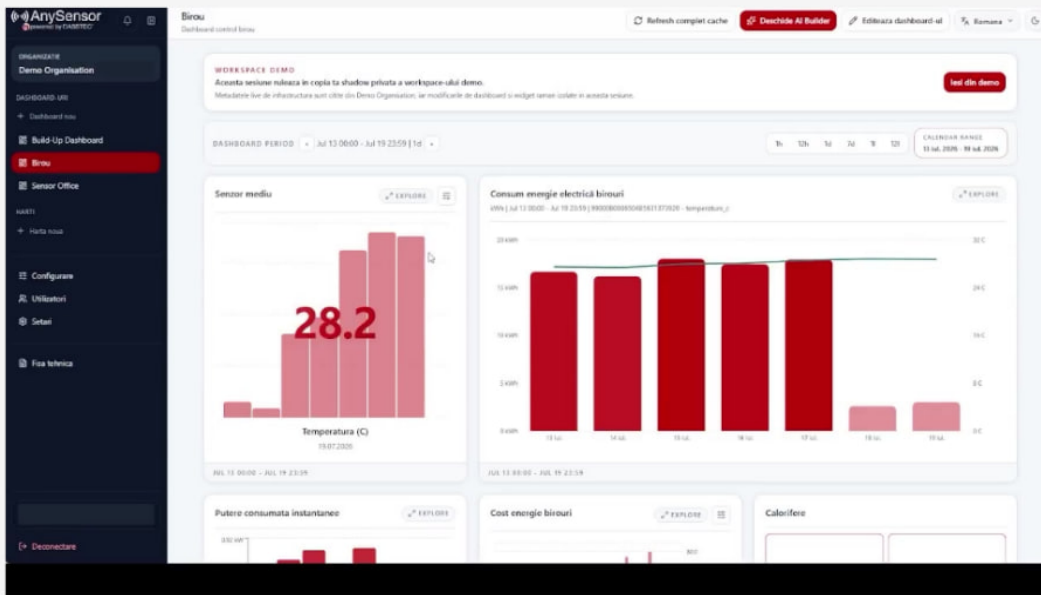

Versatile IoT Monitoring Applications

- Autonomous driving and drones
- Smart city ecosystems
- Warehouse tracking
- Smart home integration

From drones to smart cities, AnySensor powers diverse industrial environments with real-time connectivity.

Predictive Maintenance & Monitoring

Zero Unscheduled Shutdowns

Prevent costly downtime with early-stage anomaly detection and real-time industrial telemetry.

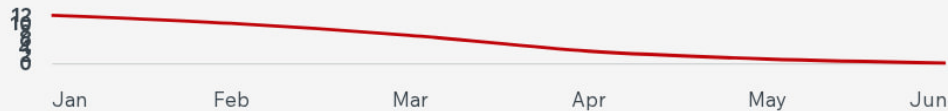

Early anomaly detection

Conveyor system health

Real-time telemetry

Industrial monitoring

Downtime Reduction Trend

**Designed for cost optimization and
maximum security,
AnySensor is the **efficient choice** for
modern automation.**

User-friendly interface

Battery-powered efficiency

Fully secure communication

Reduced industrial waste

THE ANYSENSOR ADVANTAGE

Future-Proof Your Data

Join the future of anything with AnySensor by Dasstec. Contact us today to start your IoT journey.
