AnySensor

powered by DASSTEC®

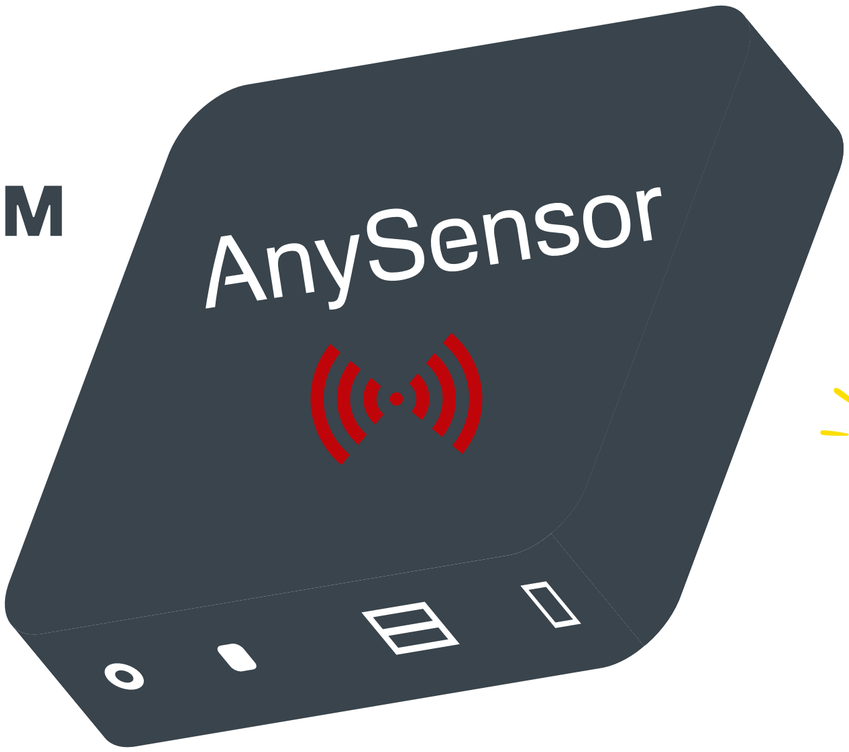
Smart, modular product in which we continuously invest newest technology

A Smart Iot Hardware & Software product produced by Dasstec easy to integrate and use in Any Industry. It is modular and integrates IoT electronic boards produced by us so we can offer you Any Development you need.

✓ **ANY** CUSTOM INTERFACE

✓ MODULAR



✓ **ANY** TYPE OF SENSOR

✓ NON-INVASIVE

Technology

AnySensor Telemetry Flow

AnySensor collects critical environmental data through smart sensors, transmits it wirelessly to an IoT Gateway = our AnyBox, and sends it securely to the cloud for processing and storage. Users can then access real-time insights, historical trends, and alerts through a dedicated mobile app = our AnySensor APP BI Platform by Dasstec — enabling smarter decisions, anytime and anywhere.

DATA COLLECTION
- From AnySensor - supports any sensor
- Temperature, movement, vibrations, any...

NON-INVASIVE
- Cost Optimization
- Easy to integrate

MULTIPLE SENSORS
- Modular - Saves Money
- Any series of sensors

REAL TIME MONITORING
- Our own IoT electronic boards
- Any Development You Need

USER FRIENDLY
- BI Platform Software by Dasstec
- WEB and APP easy to use

AnySensor

Telemetry Flow

IoT with AnySensor Telemetry, complete IoT Pyramid produced by Dasstec. From electronic boards, to 3d printing housing to BI Software.

01 Sensors – Collect data (temperature, pressure, humidity, etc.).

02 IoT Gateway – Receives data and transmits it to the server.

03 Cloud Server – Processes, stores, and analyses the information.

04 Mobile App – Receives data via API and displays it to the user (graphs, alerts, historical data, etc.).
